Introduction

Ftpracer 99 is one of the finest ftp mirroring (bi-directional) software available for Microsoft Windows 95/98/Nt , it has the following components built in :

- mutil ftp mirroring and dumping engine
- scheduler for Ftpracer 99
- dupe file checker
- zip file checker
- utilities for file management
- terminal server for remote control
- unix style commands for ftpracer shell
- tcp routing service
- various events reporting tools

Ftpracer is designed for both novice or professional users , with Ftpracer 99 , you can easily mirror or dump with ftp sites automatically , with terminal server of Ftpracer 99 , you not only can remote control and monitor the Ftpracer , but also can manage your windows system remotely . Security issues are also seriously considered to protect your Ftpracer and windows system .

System Requirement

Ftpracer requires a fairly fast computer because of the advanced options it has. Here are the requirements.

- Windows 95osr2 / 98 / NT (Win98 or WinNt5 are recommended) , service pack 3 and ie 4 are required under Windows Nt 4.0
- intel pentium class processor or higher
- 32 megabytes of ram (64 recommended)
- About 1.5 mbytes of disk space for installation
- TCP/IP is necessary
- Internet connection faster than 64k bit/s , not suitable for slow modem users , isdn or ethernet or cable modem or satellite link or T1 - T3 connection speed are recommended

Installation of Ftpracer

Ftpracer can not be used without a licensed key , (not including free demo version) , which will allow the program to run. Once the key is placed into Ftpracer program folder you will be able to run the program .

After the key is installed there is no installation. Just run the executable ftpracer.exe and the program will start right away.
